about mystartsite

MyStartSite is a personalized homepage allowing you to search multiple sites, provides easy access to your favorite sites, and allows you to receive news headlines.

Currently to perform a search, you would go to [Google](#) or [Yahoo](#). If you want to buy something, you may choose to use [Amazon](#) or [eBay](#). When you go to [Wikipedia](#) or [YouTube](#), you go there with a search already in mind.

MyStartSite allows you to search these websites- and more- by serving as a single starting point. **You can view the results from a selected search engine without having to actually go to the homepage for that specific search engine.** As a customizable homepage, you can also store your favorite bookmarks and receive news headlines (from RSS feeds).

the advantage

When you search, you most likely go through the following steps:

Step #1:

Open your web browser

Step #2:

Type the web address of the search engine you want to use

Step #3:

Enter your search criteria

With MyStartSite as your homepage, **you can skip Step #2.** Once you open your browser, **you have access to search multiple websites without having to go to them.** [Click here for instructions on how to set MyStartSite as your homepage](#)

privacy statement

Your e-mail address will not be given or sold to any other company. MyStartSite does not store what you search, although your browser might.
